

# AZ-900 Microsoft Azure Fundamentals

*Transform Technical Learning Into Real Business Understanding*

Cloud computing is transforming how modern organizations build, scale, secure, and innovate through technology. This immersive AZ-900 capability program helps learners build strong cloud foundations through storytelling, real-world scenarios, live labs, and hands-on Azure experiences.

## Why Traditional Technical Training Falls Short

Most technical training focuses heavily on theory, slides, and information overload, making it difficult for learners to retain concepts or apply them confidently in real-world environments.

At Artise, we combine storytelling, simulations, live labs, and experience-led learning to make technical concepts practical, engaging, and easier to apply across enterprise environments.

<b>Duration</b>	8-Hour Training Program
<b>Delivery Mode</b>	Live Online / In-Person / Enterprise Cohorts
<b>Level</b>	Beginner-Friendly
<b>Certification</b>	Microsoft AZ-900
<b>Hands-On Labs</b>	Included
<b>Learning Format</b>	Storytelling + Live Labs + Simulations

*Let's build the right capability program together.

## The Artise Learning Experience

This is not a traditional slide-heavy training session. The Artise learning model is built around capability transformation, helping learners understand cloud concepts through practical business journeys, enterprise scenarios, interactive Azure demonstrations, and experience-led learning.

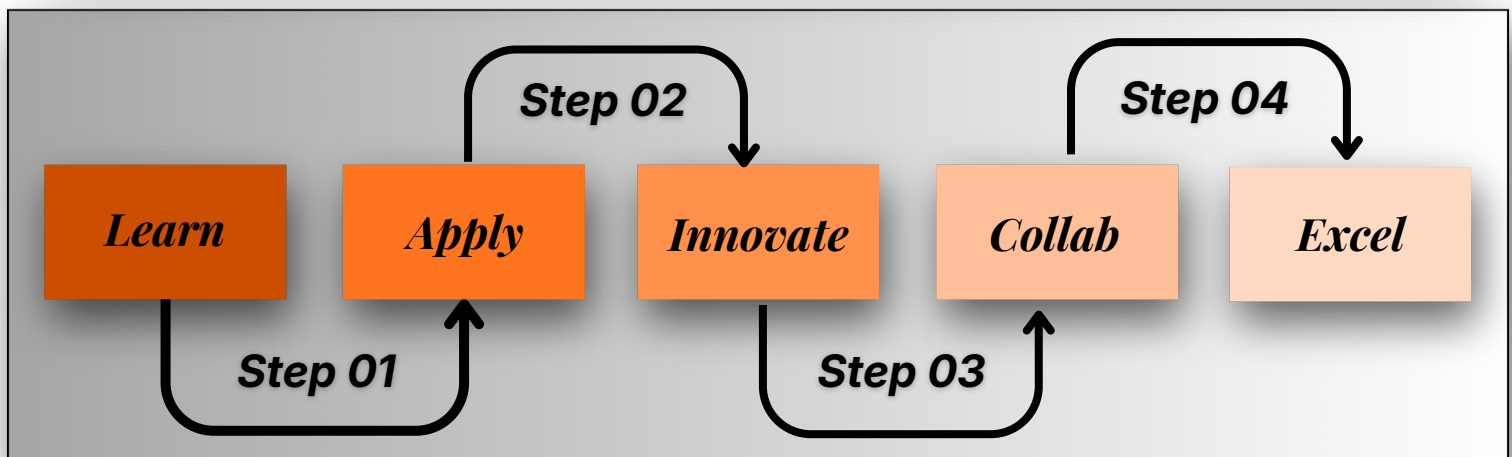

- Storytelling-driven cloud learning journeys
- Hands-on Azure labs and guided exercises
- Live Azure Portal demonstrations
- Interactive architecture walkthroughs
- Enterprise cloud migration scenarios
- Certification-focused preparation
- Cloud governance and security awareness Bus

## What You'll Be Able To Do

- Understand cloud concepts confidently
- Navigate Azure Portal and Azure services
- Understand governance and cloud pricing
- Explain cloud models to stakeholders
- Understand identity and access management
- Prepare effectively for AZ-900 certification
- Build confidence with real-world Azure exposure

*It's not Training, It's Storytelling. Experience Learning Paths*

## Learn Through Real-World Cloud Journeys

Every session follows a real-world enterprise cloud transformation journey. Learners experience how organizations migrate workloads to Azure, manage cloud security, optimize operational costs, scale applications, and govern enterprise environments effectively.

This storytelling-led methodology improves engagement, strengthens retention, and helps learners understand not only **how Azure works**, but also **why organizations adopt it**.

## Hands-On Labs & Interactive Activities

- Azure Portal Hands-on Practice
- Cloud Architecture Simulations
- Virtual Machine Deployment Exercises
- Networking & Storage Demonstrations
- Identity & Security Walkthroughs
- Azure Monitoring & Governance Labs
- Interactive Discussions and Scenario-Based Activities

## Learning Journey Framework

Storytelling	Hands On Labs	Application
Business Scenarios	Azure Simulations	Enterprise Readiness

## AZ-900 Curriculum Journey

The curriculum is aligned with the latest Microsoft AZ-900 certification structure while remaining practical, enterprise-focused, and beginner-friendly.

### Describe Cloud Concepts (25–30%)

- Cloud foundations
- Hybrid cloud models
- Serverless computing
- IaaS, PaaS & SaaS
- Governance & scalability

### Describe Azure Architecture & Services (35–40%)

- Azure networking
- Virtual machines & storage
- Migration tools
- Entra ID & RBAC
- Zero Trust security

### Describe Azure Management & Governance (30–35%)

- Cost management
- Azure Policy
- ARM templates & IaC
- Azure Monitor
- Service Health

## Who Should Attend?

### Individual Learners

- Aspiring cloud professionals
- Fresh graduates
- IT support teams
- Consultants and analysts

### Enterprise Teams

- Digital transformation initiatives
- Cloud migration teams
- Future-skills enablement programs
- Enterprise capability-building initiatives
